

## Innovation PEI Pilot Fund Supports 20 Projects

PEI Business Development is pleased to announce that it will provide funding to the top 20 scoring innovative projects from prospective entrepreneurs, researchers, and established companies under the first round of the Innovation PEI Pilot fund. The aim of the program is to provide successful proponents with \$25,000 to support testing of innovative ideas with commercial potential. In total, over 50 applications were received in this first round of the Innovation PEI Pilot fund. Below is a summary of the successful applicants in alphabetical order.

Proponent/Applicant	Project
Altantic AgriTech Inc	Screening of plant extracts for crop disease control
AVC/UPEI	Infrared immunoglobulin test
Charlottetown Metal Products	Continuous flow high pressure steam processor
Chemaphor/NRC	Effects of oxidized beta-carotene
Diversified Metal Engineering	Innovative small scale brew system
Eco-Blaze	Clean agriculture residue burner
Elevator Software	MHP data transmission development
Elsley R&D	Electronic early childhood learning and development toy
Honeywell	Solenoid repair development
Island Abbey Foods	Dehydrated honey gear pump/pilot testing
Maritime Quality Milk	Development of a mastitis detection kit
NRC & GlaxoSmithKline	Evaluation of phytochemical effects on human mast cell activation
Nautilus Biosciences	Pilot scale purification of a marine bioactive
Neurodyn, Helix BioPharma, & NRC	Sensor Development Project
Pellagri Energy	Commercial/residential bio fuel heating solution
Phytocultures Ltd. & NRC	Chemical profiling and health benefits of haskap berry extracts
Reform Technology	Online construction administration management software
Shared Solutions	Net Courts
Terry Smith & Gordie Noye	Smart phone embedded technology tool kit

Watermill Company	Clean energy project
